1. The following is an examiner's statement of reasons for allowance: Claims 1-7, 9, 14-26, 28, 29, 31, 32, 35, and 37-39 are allowable because the instant application is directed to a nonobvious improvement over the invention described in US Pub. The improvement comprises a controller to emulate a Universal Serial Bus (USB) human interface device that represents a second pointing device that is of a different type from the first pointing device, the controller to generate second pointer position data in response to the first pointer position data, wherein the scaling of the intermediate position data to the first pointer position data is according to size information of the second pointer device. *This patentable distinction is included in independent claims 1, 17, 32, and 35.*
